

Lasso

A lasso is a weapon described on UA 77.

A hit **snags** the target (along with the other effects listed on UA 77). When snagged, the wielder of the lasso can take a [G action](#) to **drag** the target moves them 1" closer to the wielder.¹⁾

To get un-snagged, see the procedure on the [harpoon](#) page. Additionally, instead of cutting the line, the victim can take an E action to attempt to snap the line with BB/LG. Only one such attempt can be made per lassoing incident.

See UA 77 for additional rules and stipulations. Also see the [harpoon](#) and [net](#).

¹⁾

Unlike the [harpoon](#), the lasso does not do damage when dragging.
