

# Monsters

## Variations

Monsters can come in variations and forms unlike the ones listed in the monster books. Variations on monsters are common in modules and other publications throughout the age.

## At-will abilities

An at-will ability can be used on the same round as an attack routine (e.g. demons). Unless the monster entry provides an exception, a monster can use only one activated at-will ability per round.

Abilities which are triggered by some situation and “passively” activate are not included here; unlimited passive abilities, one at-will ability, and regular attack routine(s) could all be performed on the same round.

## "In addition" abilities (e.g. hell hound, iron golem)

These are abilities such as the hell hound's breath and the iron golem's breath, which both use language like “in addition to the regular attack”. These monsters perform their regular attack routine and use their ability on the same round, as with [at-will abilities](#).

## Paralyzing attacks

Ghouls, carrion crawlers, and other creatures which paralyze but do not have an effect duration listed paralyze for 1d10+2 turns.<sup>1)</sup>

## Breath attacks

Saves are always for breath weapon, even for “poison” breaths like green dragon breath. Bonuses to poison saves do not help against breath weapons.

## Dragon breath

See [Dragon](#).

## Constricting attacks

See [Constriction](#).

## Gaze attacks

Use rules under Dracolisk MM2 entry to determine if gaze is met, unless otherwise stated. Ranged avoiding-gaze attacks always miss, only melee has a chance to hit while avoiding gaze.

## Polymorph ability

Monsters' [polymorph](#) ability is *polymorph self* unless explicitly stated otherwise.

## With multiple ACs

Some monsters have more than one listed AC. In some cases, rules are provided in that monster entry to determine which AC is targeted (e.g. die roll, positioning).

In cases when no rules are provided, or when positioning isn't obvious, the same rules for attacking a helmetless character can be used.<sup>Ex2)</sup> If the attacker is intelligent and declares that they are targeting a particular body part, they will strike it on a 3-in-6; otherwise the attack strikes the AC least-favorable to the attacker. If the attacker is unintelligent, they will happen to strike a weaker AC location on a 1-in-6. If there are multiple locations with weaker-than-max-AC locations, a random die roll can be made to see which one is hit.

## Brain moles

Brain moles always *mind thrust* with 121 strength, and do not have points to spend or lose. The brain mole *mind thrust* is more of a natural power than the standard psionic *mind thrust*. They cannot be psionically attacked as a psion, only escaped, slain "normally," or 100+ point *psionic blasted*.<sup>3)</sup>

1)

TODO: This is sourced from official modules but we need to list the exact source(s).

2)

DMG 28.
