Outfitting Sheet

View: Latest version (v1.1.0)

Instructions

This sheet makes outfitting a new character a lot easier. There are plenty of examples in the sheet already. To use it:

1. Copy the sheet to your own Google Drive.
2. Share the sheet with all your players, making sure to give them Edit permissions.
3. Instruct your players to commandeer a column any time they need to roll up a new character. The sheet basically functions like a scratch pad. When another player needs to use the sheet, they can either use a blank column or just delete the contents of a column that was used by a previous player.

Note about Google Drive

See the note about Google Drive.

Credits

The original outfitting sheet was created by Sax. Later on, it was improved by Dev.
