

Treasure Splitter

View: [Latest version \(v1.1.0\)](#)

Instructions

This is a helpful worksheet that can help a group split up metal, gems, and jewelry at the end of an expedition.

If there are henchmen in the party, when setting "Number of characters for split", add 2 for PCs and 1 for henchmen, and treat resultant shares as a half share. PCs get two half shares, and henchmen get one half share.
